Bitss C User Manual

Bitss C Antispam Plugin - User Manual & User Guide

Introduction:

Thank you for choosing Bitss C Antispam, your ultimate solution to combat contact form spam and protect your website. This user manual and guide will walk you through the process of uploading, activating, and managing the plugin, as well as how to resubscribe after your subscription expires. Let's get started!
After successful payment, you will receive an email containing your Bitss C License Username and License Key. Keep this information secure as it grants you access to the plugin features.

To Download the Plugin Follow These Steps:

- Log in to your account on the Bitss website.
- Navigate to the download section and click on the link to download the Bitss C plugin. The plugin will be in a zip file format.

1. Installing & Activating the Plugin:

- Download the Bitss C antispam plugin from your account dashboard.
- Log in to your WordPress admin dashboard.
- Go to "Plugins" > "Add New."
- Click on "Upload Plugin" and select the downloaded zip file.
- Install the plugin and click "Activate" to activate it on your website.

2. Configuring Bitss C Antispam Settings:

- After activation, go to settings and find the "Bitss C settings" menu in your WordPress dashboard settings.
- Click on "Bitss C settings" to access the plugin settings.
- Enter your license username and key (sent to your account email) to activate the plugin.
- Save the settings to apply the changes.

Terms & Conditions:

This official license authorization and authentication were issued by Bitss, a division of Bfin Cybersecurity Solutions. We hereby confirm that the user has been granted the legal rights to use our proprietary software or product under the specified licensing agreement.

- This license authorization is non-transferable, and any unauthorized distribution, sale, or reproduction of the licensed product is strictly prohibited.

- The licensee is permitted to use the licensed product within the agreed-upon duration and for the stated number of users/devices as per the licensing agreement.

- Any modifications, reverse engineering, or tampering with the licensed product are strictly prohibited and may result in legal action.

- The licensee is responsible for ensuring compliance with all applicable laws, regulations, and intellectual property rights related to the licensed product's use.

- Bitss retains all rights, title, and interest in the licensed product, including any updates or enhancements that may be provided during the license period.

- In the event of a breach of the license agreement, Bitss reserves the right to revoke the license authorization and take appropriate legal action.

By accepting this license authorization and authentication, the user agrees to abide by the terms and conditions set forth herein. This authorization is subject to the terms of the licensing agreement between Bitss and the customer.
