

# Bitss VWAR Frontline User Manual

To install **BITSS Frontline Virus War Defender – VWAR (Plugin Version)**, simply follow these straightforward steps

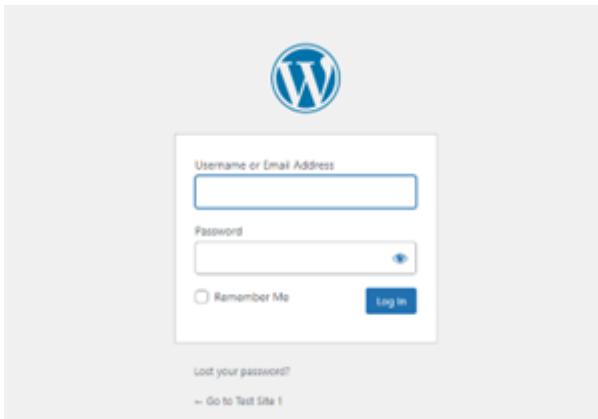

## 1. Get The Plugin

Download the plugin as a `.zip` file from

## 2. Log in to WordPress Admin Dashboard

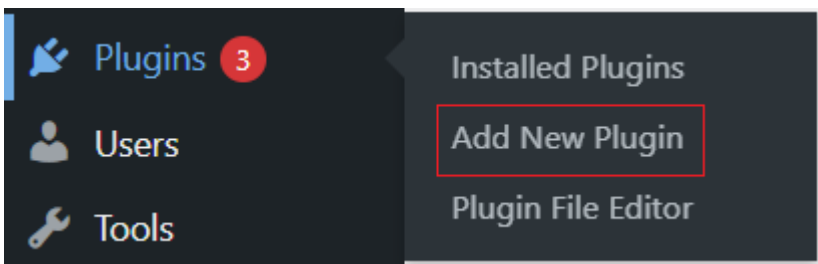

Go to your WordPress site's admin area. Usually, you can access it via:

<https://yoursite.com/wp-admin>

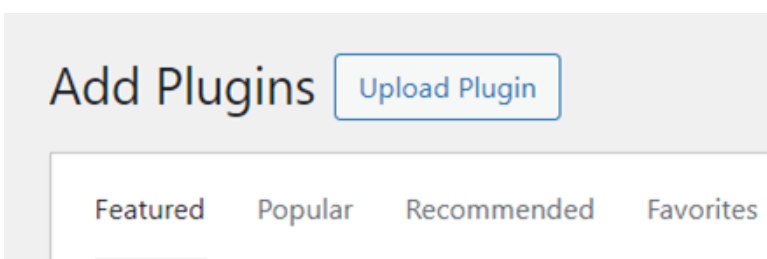

## 3. Go to the Plugin Section

- In the left sidebar of the admin dashboard, hover over or click on the **Plugins** tab.
- Then click on **Add New** at the top of the page.

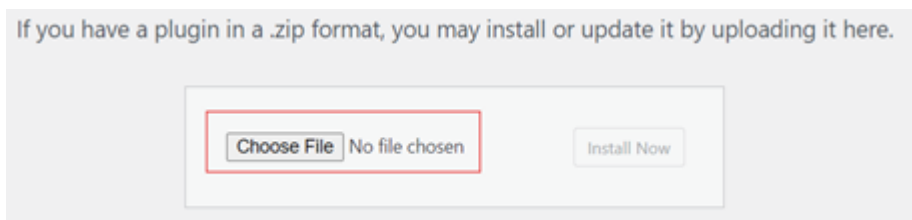

## 4. Click “Upload Plugin”

- At the top of the “Add Plugins” page, you’ll see a button labeled **Upload Plugin**. Click on that.

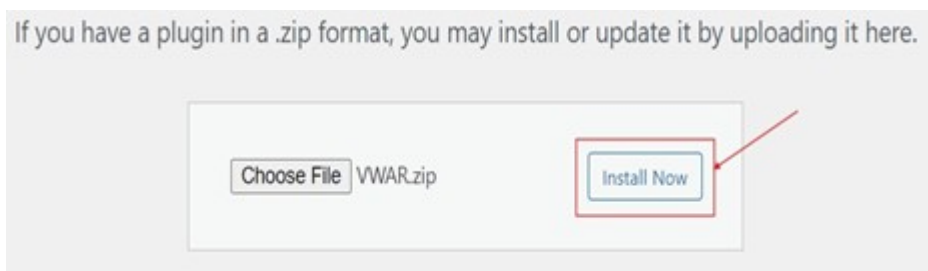

## 5. Upload the Plugin.zip File

- Click the **Choose File** button, locate the .zip file of the plugin on your computer, and select it.
- After selecting the file, click the **Install Now** button.

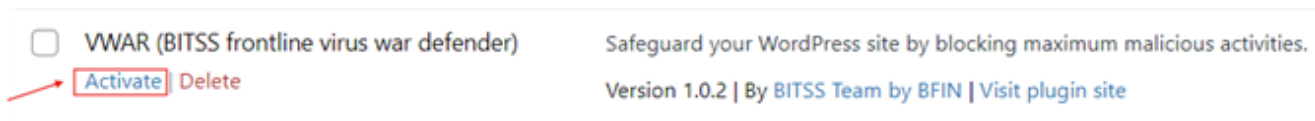

## 6. Install the Plugin

- WordPress will now upload and install the plugin. Wait for the process to complete.
- Once done, you should see a message saying the plugin has been installed successfully.

## 7. Activate the Plugin

- After installation, you'll see an option to Activate Plugin. Click this to enable the plugin on your site.

Once activated, you will find the **BITSS Frontline Virus War Defender – VWAR (Plugin Version)** plugin conveniently located in the left-hand menu bar of your WordPress dashboard, making it easily accessible for managing its features and settings.
